

# LUG JAPAN 2022

# JLUG 2022

- Expanding Use Cases for Lustre Solutions
  - Machine Learning
  - Natural Language Processing
  - Large Data Lakes
  - Expanding Cloud Use Case
- New Technologies
  - Improved scale-out for Metadata
  - Performance optimizations (e.g. metadata)
  - NVMe Caches (hot pools, hot nodes)
  - NAS and Object Interfaces
  - Global Failure Analytics

# JLUG Towards the Future

- Considering to Expand the Scope of JLUG in 2023
  - Existing Users
  - Future/Prospective Users
- Possible Areas
  - Broader Use Case Coverage
  - Usability and Problem Analysis
  - Application Acceleration
  - Related Scale-out File or Object Technologies
  - Future Technologies
  - Lustre User/Administrator Training
