Safe Harbor Statement

This presentation may contain forward-looking statements that are based on our current expectations. Forward looking statements may include statements about our financial guidance and expected operating results, our opportunities and future potential, our product development and new product introduction plans, our ability to expand and penetrate our addressable markets and other statements that are not historical facts. These statements are only predictions and actual results may materially vary from those projected. Please refer to Cray's documents filed with the SEC from time to time concerning factors that could affect the Company and these forward-looking statements.

Cray CS400 Cluster Supercomputers

Capacity Computing Focus

- Price/Performance/Watt
- Flexible system configurations
- Industry Standards Technologies
- Manageability and Reliability
- Modular Scalability

Cray XC40 Supercomputers

Capability Computing Focus

- Application Scalability
- HPC Optimized HW, SW & IP
- Price/Performance
- Roadmap Upgradability
- Reliability/Availability/Serviceability

Scaling Across the Performance Spectrum

Cray XC40システム

CRAY®

Adaptive Supercomputing

- Flexible Processor Options & Upgrades
- Hybrid Systems
- Adaptive Network Routing
- Advanced Adaptive Programming Tools

Scalable Performance

- Enhanced Aries Interconnect
- Global Network Bandwidth
- HPC Development Tools
- Cray Linux

Comprehensive HPC Integration

- HW & Networking
- SW Environment & Partner Ecosystem
- Storage
- Reliability & Resiliency

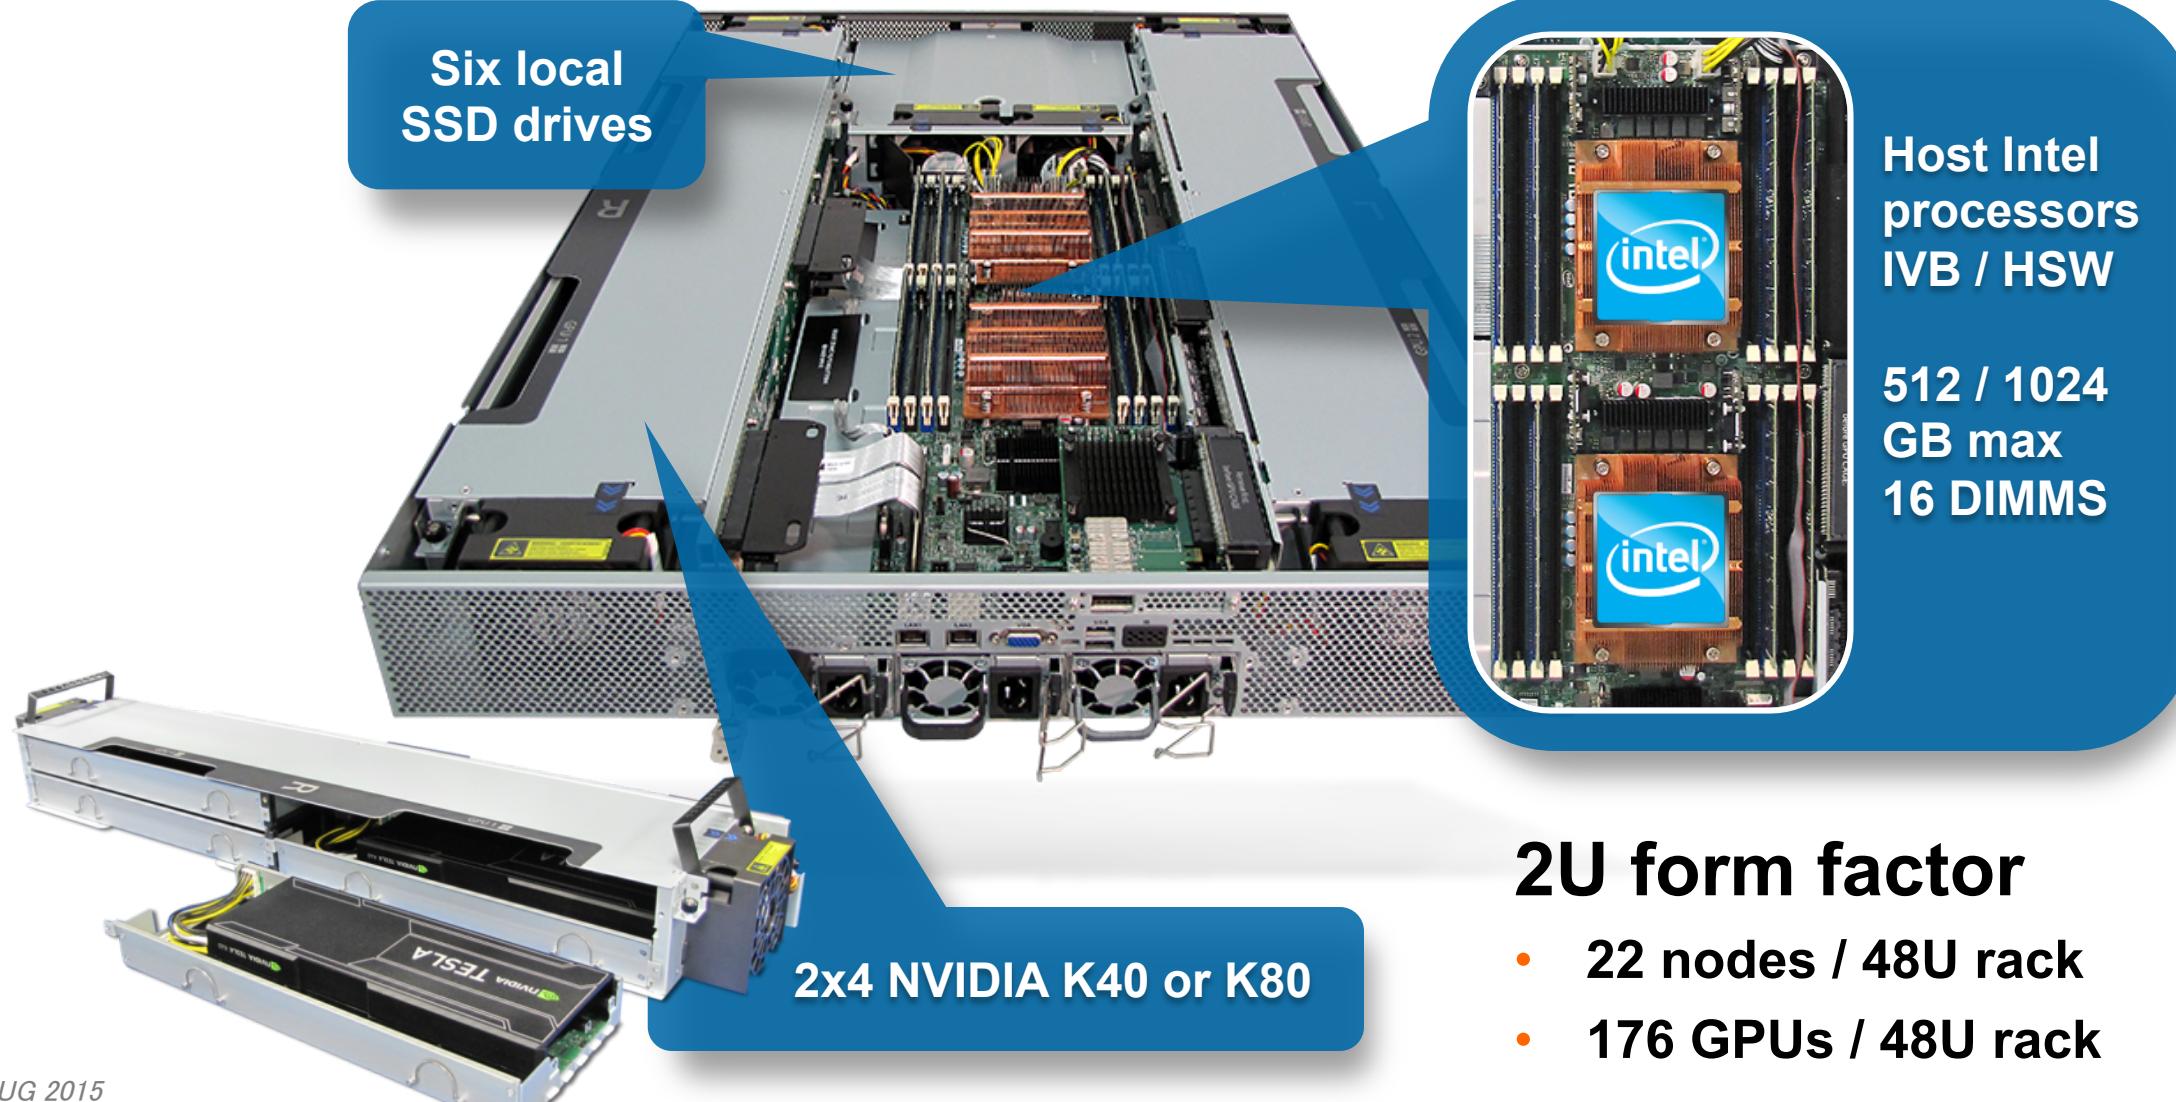

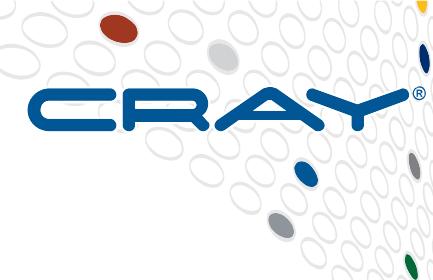

Cray XC40-ACシステム

- ❖ XC40と同じ計算ブレードを使用
- ❖ 1キャビネットに64ノードを収納
- ❖ 空冷冷却(XC40は水冷冷却)
- ❖ 電源は3相200V(XC40は3相400V)
- ❖ 最大8キャビネット構成(最大500ノード)

CS-Storm: Innovative Design

The image shows the CS-Storm server hardware, which consists of two main parts: a large white 2U rack unit and a smaller black 2U rack unit. The white unit has a front panel with several drive bays and a power supply unit. The black unit is open, revealing its internal components. A callout bubble points to the black unit's internal drive bays with the text "Six local SSD drives". Another callout bubble points to the white unit's drive bays with the text "2x4 NVIDIA K40 or K80". A third callout bubble points to the black unit's motherboard with the text "Host Intel processors IVB / HSW 512 / 1024 GB max 16 DIMMS".

Six local SSD drives

2x4 NVIDIA K40 or K80

Host Intel processors
IVB / HSW
512 / 1024
GB max
16 DIMMS

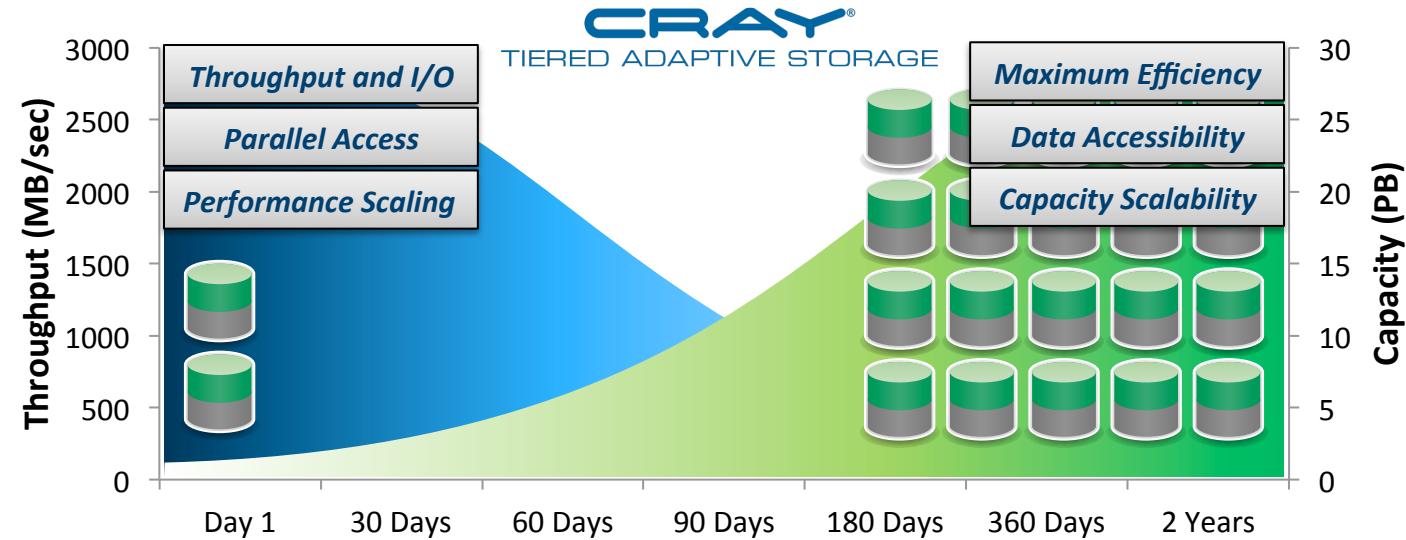

2U form factor

- 22 nodes / 48U rack
- 176 GPUs / 48U rack

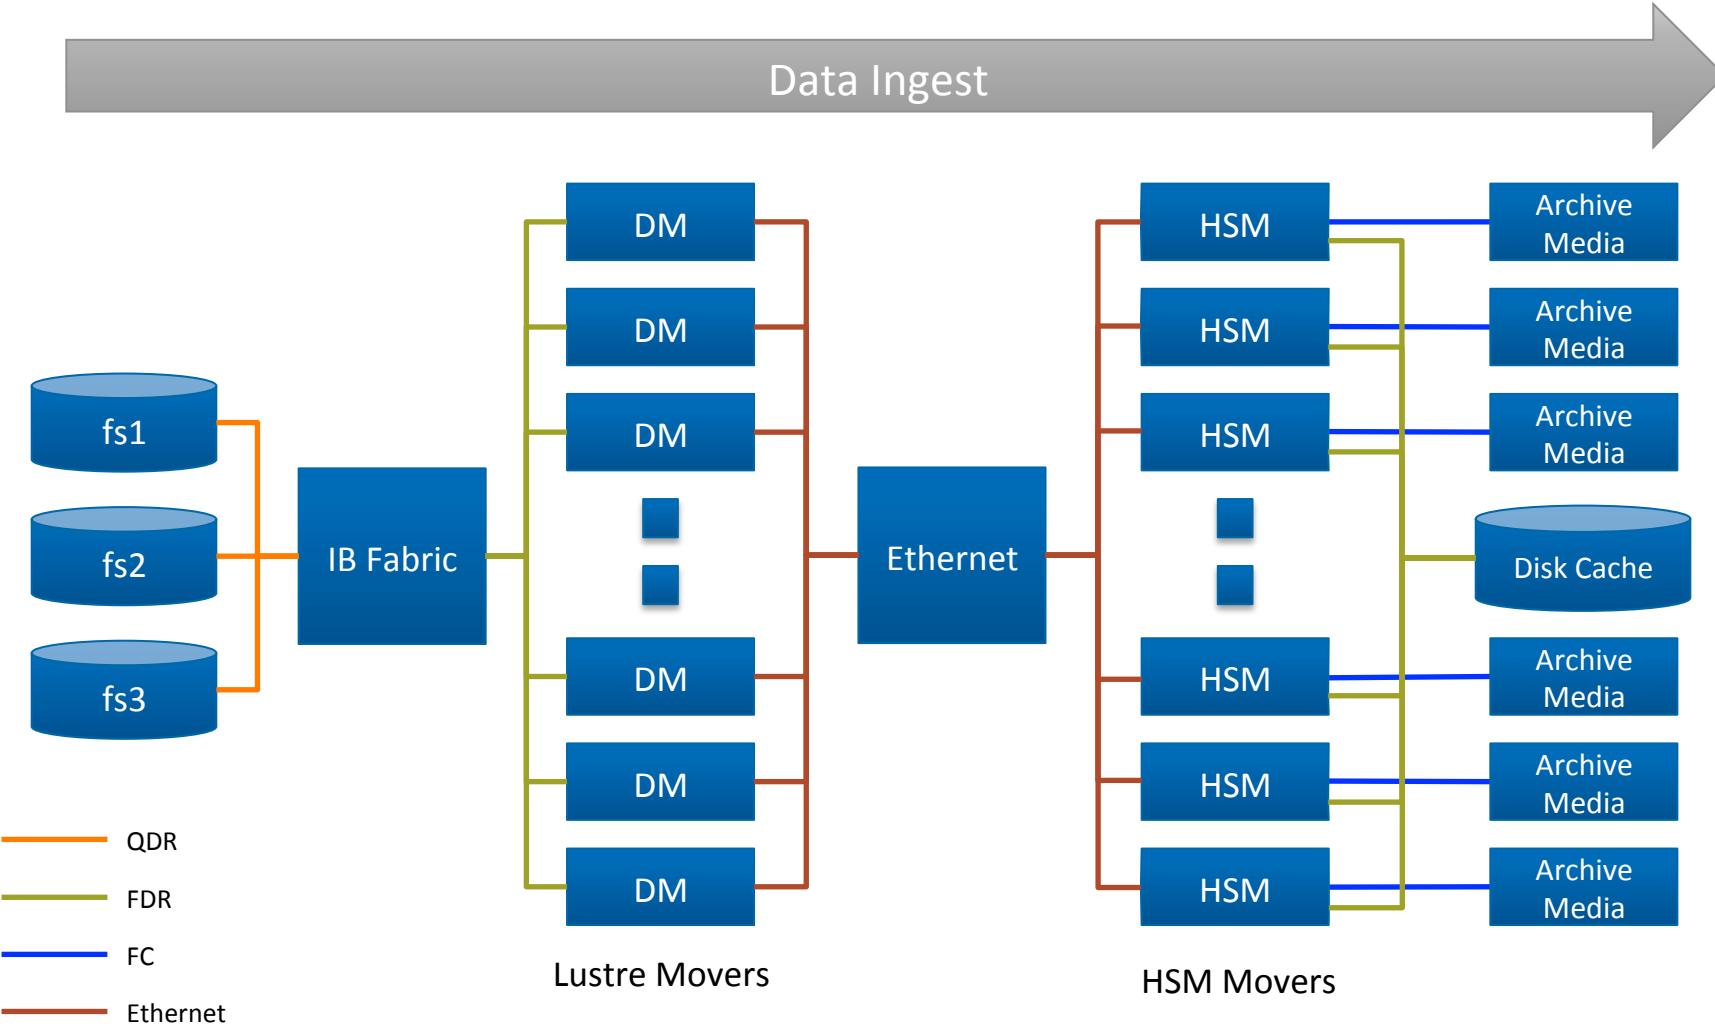

Cray Tiered Adaptive Storage

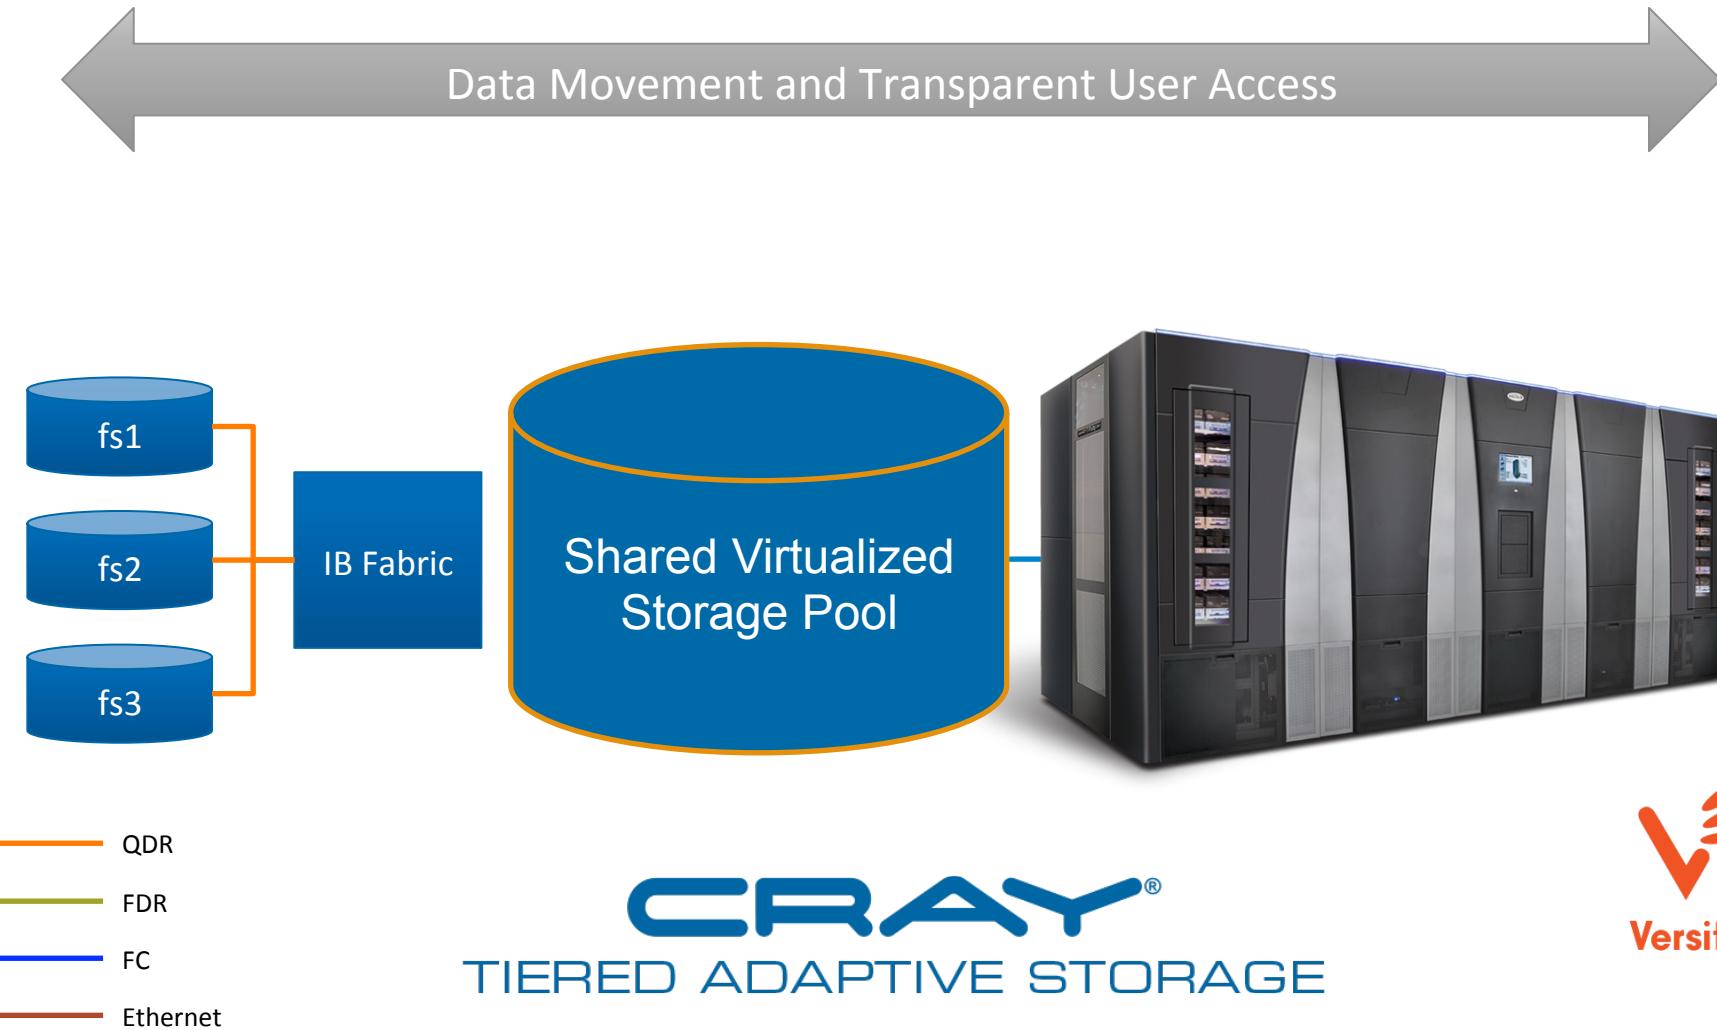

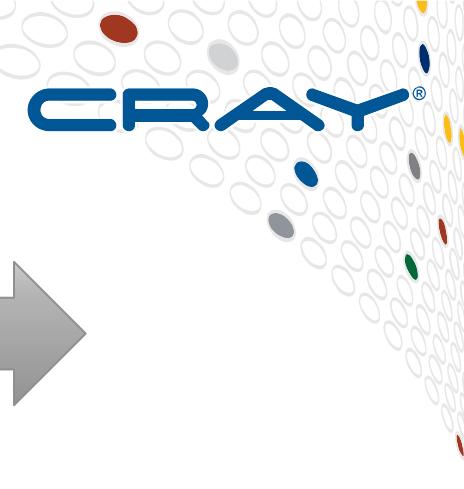

- どのようなデータが本当に高速なストレージシステムを必要としているか?
 - ❖ ユーザの約80%は、データの20%に対してのみで十分
 - ❖ 実際には複数のペタバイト・ファイルシステムは不要かもしれません
- 解決手段はデータのTime-Valueを管理すること
 - ❖ まれにアクセスされたデータは、適切なTier(ディスク/テープ)に自動的に移動
 - ❖ データ・ライフサイクルを通してデータ保護を維持
 - ❖ 特別なI/Fを使用せずにユーザによるすべてのTierへの透過的なアクセス

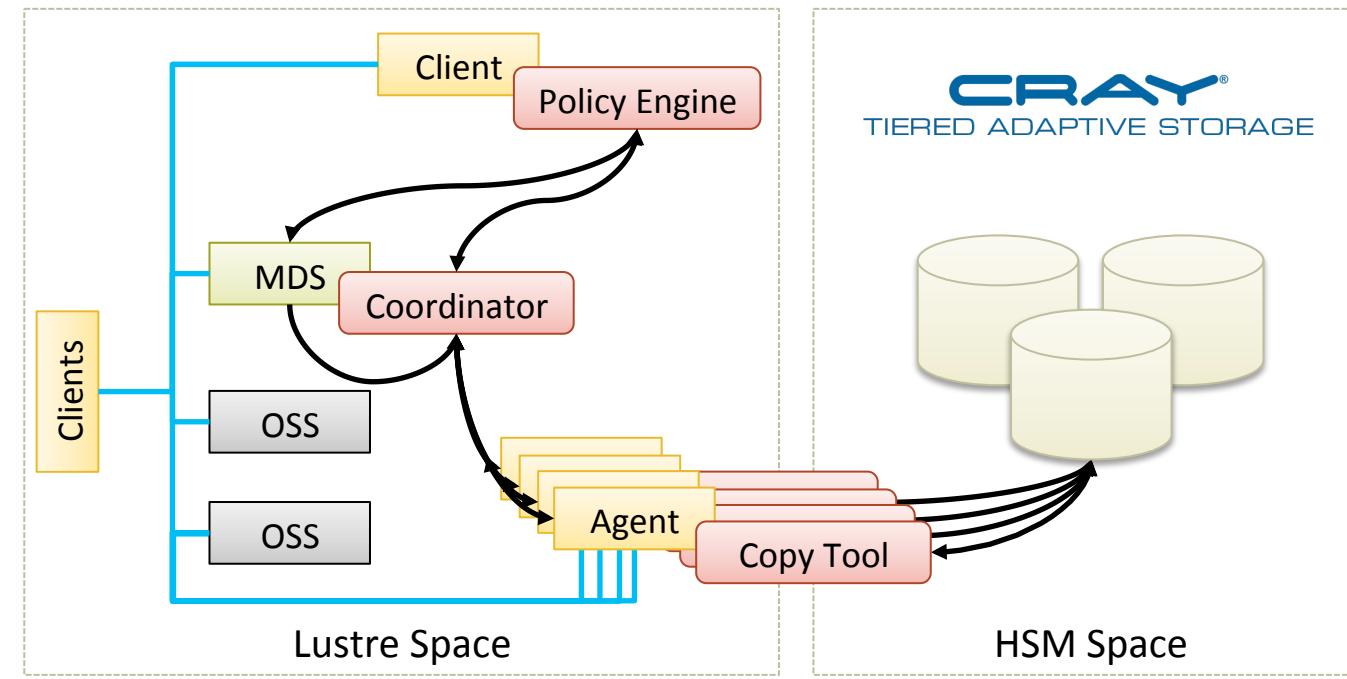

Traditional HSM Implementation

Cray Tiered Adaptive Storage

Cray TAS Connector for Lustre File System

Policy engine

Robinhood policy engine to manage Lustre namespace activity

Coordinator

Communicates with policy engine and agents to manage data movement

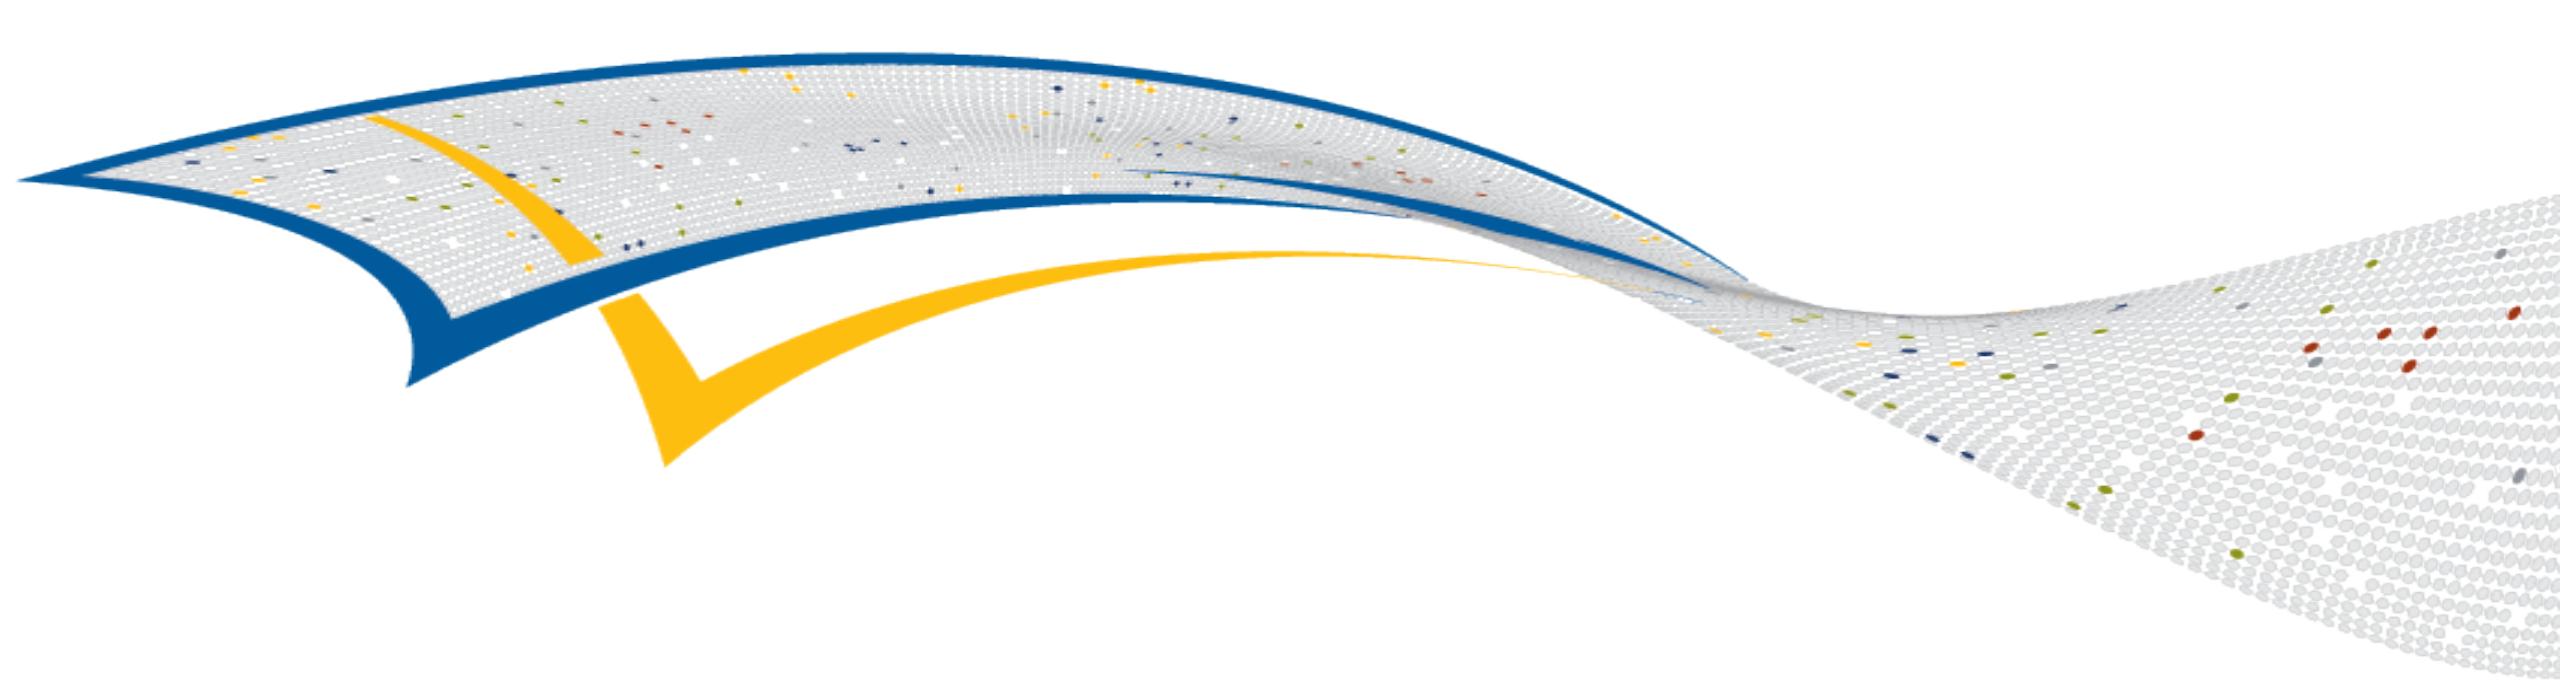

Agent and Copy Tool

Lustre clients with copy tool software to migrate data between Lustre and TAS

- HPCベンダとして包括的なソリューション、製品をご提供
- Lustreの豊富な実績
- LustreとHSMを効果的に組み合わせた新ソリューションTAS
